Indications for Reproductive Genetic Counseling

- ✓ Personal or family history of a birth defect, intellectual disabilities, autism, chromosome condition, or genetic condition (i.e. cystic fibrosis, sickle cell anemia, MCAD)
- ✓ Concern for potential medication or teratogenic exposures
- ✓ Maternal conditions (such as diabetes and seizures)
- ✓ Infertility, recurrent pregnancy loss, and applicable genetic evaluations
- ✓ Advanced maternal age
- ✓ Advanced paternal age
- ✓ Interest in in vitro fertilization and preimplantation genetic testing
- ✓ Questions about donors
- ✓ Carrier Screening
- ✓ Standard and indicated screening and testing options and abnormal test results
